1 Start Early and use compound interest to your advantage.

Spouses and families have access too

Especially if one spouse will have a pension and the other won't, this is a great way to balance out income after retirement. And you can transfer existing RRSPs and TFSAs into the program!

2 Pay yourself first!

Set up payroll deduction (or pre-authorized contributions) and watch your savings grow.

How Payroll Deduction works

1. Your RRSP contribution is taken off your pay cheque BEFORE taxes. You are then taxed on the remainder of your pay.
2. Immediate Tax Savings means that you get your tax return back on that same pay cheque.

Your Monthly Contribution	Your Actual Cost	
\$100	\$69.50	\$64
\$200	\$139	\$128

Tax bracket = 30.5% Tax bracket = 36%
Yearly taxable income = \$46,605 - \$93,208 Yearly taxable income = \$93,208 - \$128,145

Investments at every stage are always made up of a mix of different categories, in order to capitalize on the upside of growing markets, but also to protect you when one kind of investment goes down as part of its normal cycles – essentially “spreading out the risk”.
